

GARWARE
TECHNICAL FIBRES

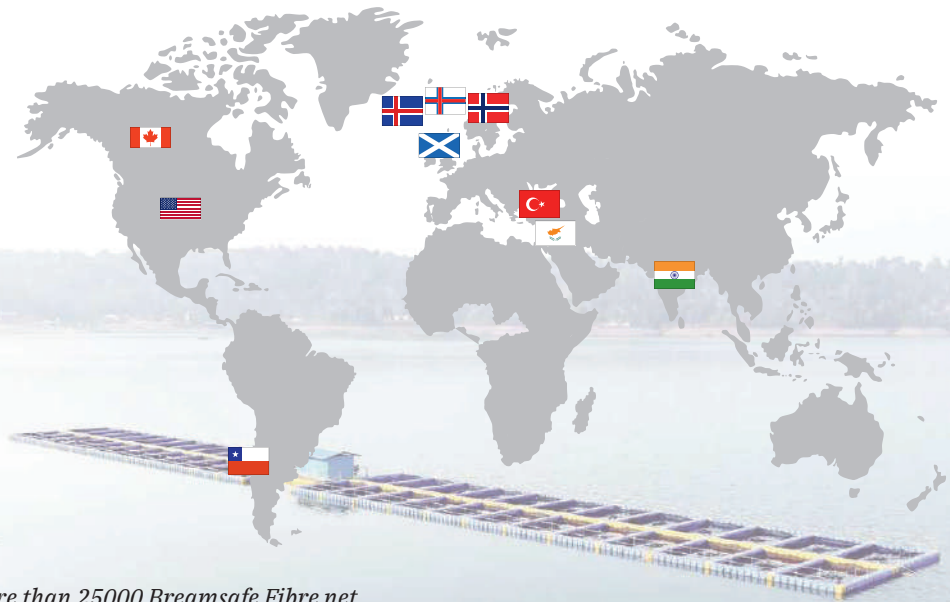

Cage Farming Aquaculture Technology

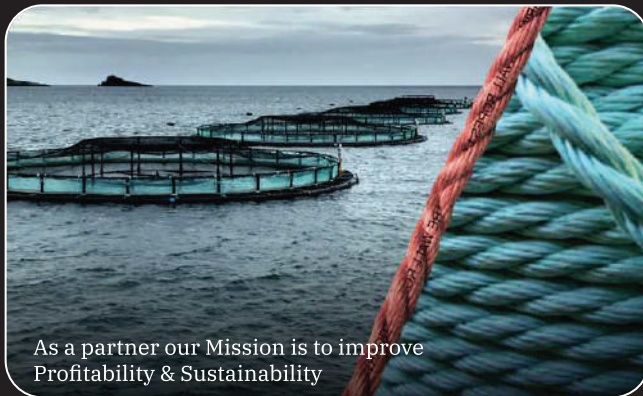

Your Aquaculture Technology & Service Partner

Garware Nets top of the line for more than 40 years

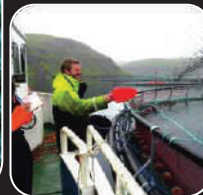

A superior Fibre alternative to Nylon for more efficiency and economy, Fibre Net Cages are specially designed innovative products of GTFL for the sustainable aquaculture industry worldwide

More than 25000 Breamsafe Fibre net cages are installed in India

As a partner our Mission is to improve Profitability & Sustainability

Sapphire Nets

High-Strength netting to protect cage aquaculture fishes from predators

X2 Aqua Mooring Ropes

High Performance Aqua Mooring Ropes GTFL redefines the paradigm of mooring with the technologically advanced application focused X2 mooring ropes to deliver unmatched performance

Maxima Ropes

Maxima 3 strand Poly propylene from blended polymers with special lay for low weight and high strength

Net Assembly :

A complete netting solution for fishing and aquaculture industry

Our Net Assembly manufactures cages, predator protection nets and bird nets for aquaculture. Spread over an area of 15,000 square meters and employing 600+ skilled manpower, this is easily one of the biggest assembly facilities in the world.

Key Features

- Quality control at every stage of the production process & ensuring high performance of products
- Advanced Technologies used for net manufacturing and processing to impart best possible dimension and stability
- Fibres are used Polyester, Nylon & HDPE
- Wide product range with large production capacity and in- house production ensures prompt delivery
- All designs are kept confidential

Aquaculture Product Range

Cage Nets

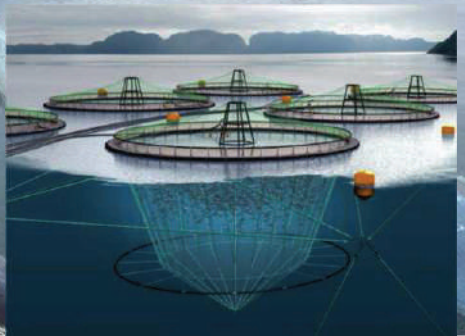

- Made from knotless and knotted netting in Nylon, Polyester & HDPE
- Manufactured according to design and dimension required by the customers
- Available in circular, hexagonal, square, rectangle, hex-conical or any other geometrical shape as required by the customer
- Mesh sizes are available in diamond, square & hexagon shape
- Made for Salmon, Seabass, Seabream, Tilapia, Tuna, Pungasius, Cobia and Barramundi
- Cages for Cod also available in Sapphire and Plateena netting

Unique Features

- Cage Netting is made from high tenacity, UV resistant yarn
- Netting and ropes are pre-treated and stabilized
- Options available for hand lacing as well as machine stitching

Benefits

- Due to pre-treatments, netting has minimal shrinkage even after long exposure
- Use of heat set ropes results in minimal shrinkage
- 100% mesh opening results in excellent water flow & high oxygen level to fishes
- Heat setting imparts uniform breaking strength
